

CABBANI®
custom made parquet

This Brochure will take you into the world of Cabbani. This is a world where wood plays the leading role. Discover why nothing beats the charm and character of a wooden floor. Indeed, parquet is timeless while being more relevant than ever before.

But because even the best photos sometimes fall short, we would like to invite you to a Cabbani distribution point to see and feel our parquet for real and to breathe in the aroma of the wood.

With this brochure, we hope to inspire you in your search for a durable floor with timeless beauty.

Introduction 04-05

A sustainable choice 06-07

Finishing & Maintenance 50-53

Technical table 54-55

MADE IN FRANCE WITH LOVE

Thirty-five years ago, Gérard Cabannes gave shape to his dream. He began a veneer processing company surrounded by the inspiring vineyards of the Bordeaux region. He constantly built on his successes and with the second generation, Benoît and Julien Cabannes, this led to the production of laminated parquet in 2000.

Their brainchild, the parquet system à la carte, with which the customer can assemble a wooden floor as desired, turned out to be another bull's eye. Quality and flexibility took the company to the top of the upmarket wooden flooring segment in no time.

After a professional relationship for over 25 years, and in view of the complementarity of the production sites on both sides, Benoît and Julien decided to make the partnership more permanent and their company was integrated into the Decospan group. New opportunities arose. Since January 2016 their parquet has been available in specialised parquet shops under the CABBANI name. Under this brand name, we continue to invest in the production of this high quality custom French parquet to serve customers worldwide.

A SUSTAINABLE CHOICE

Decospan gives respect for nature a central place in its policy. This conviction was embodied in the Pure Wood Charter. Suppliers are asked to sign and adhere to this charter. It gives a clear signal to both customers and suppliers that engagement in preserving nature is an important part of our strategy.

OXYGEN FOR THE ENVIRONMENT

Trees and forests are the green lungs of our planet. They take up CO₂ from the atmosphere and produce oxygen in the process. Relative to other building materials, wood can lead to a significant reduction of the amount of carbon dioxide. Every cubic metre of wood is equal to 2 tons less CO₂ in the atmosphere.

CARE FOR THE FUTURE

Wood is a sustainable and optimally recyclable resource. At the end of its lifecycle, it is perfect to reuse in new products and applications. In this way, a large volume of carbon is stored in the wood for a long time. Reusing wood also means that no other, often non-renewable, materials need to be used.

ATTENTION FOR FORESTRY

Responsible forest management with replanting and controlled felling maintains the total amount of trees and forests. This prevents this valuable resource from being exhausted prematurely and keeps our environment in balance. With this and other measures, we can confidently say that choosing wood means choosing the future while promoting a sustainable economy.

HEALTHY INTERIOR CLIMATE

In the meantime, a Cabbani parquet floor improves the air quality in your home. Indeed, all our efforts during the production process focus on making your house into a healthy home. We achieve this by only using harmless water stains and adhesives that are free of volatile organic compounds (VOCs). Our lacquers also contain a minimum of harmful solvents. This gave us an A+ label, which stands for the best residential air quality.

PEFC™ stands out by taking into account the specific characteristics and legislation of every country. PEFC™ aims to prove that it is possible to combine forest conservation with rising consumer demand for wood.

Available on request for projects from 500 m².

FSC® is an international, independent, non-governmental non-profit organisation. It was established by forest owners, the wood sector, social movements and environmental organisations. FSC® promotes responsible forest management all over the world.

Available on request for projects from 500 m².

COLLECTION 04

Compose your own dream parquet

Cabbani stands out for its unique 'à la carte system'. By playing with and varying a number of parameters, the end result is guaranteed to meet all your requirements and expectations.

Easily put your personal parquet by choosing from 5 colour collections, 26 individual colours, 5 board dimensions, 4 different top layer thicknesses, 2 types of cores, 2 finishes (varnish or oil) and 5 grades.

Learn about various options starting from page 42.

COLLECTION 02

Did you know that Cabbani parquet is produced in the same region as the famous wines Saint-Emilion, Puisseguin, Pomerol... a stone's throw from Cognac? Cabbani also guarantees 100% French quality.

BATON-S 14H - Chablis Rustic

Chablis

COLLECTION 04

Did you know that the patterns Herringbone 'Baton' and Hungarian Point 'Chevron' are the two oldest installation methods for wooden flooring? Herringbone is the oldest and finds its roots in Europe, were they probably wanted to repeat the zigzag pattern of earlier architectural styles. Those floors became extremely popular in France under the name 'Bâtons Rompus' which literally means 'broken sticks'. The Hungarian point came into fashion later, during the 17th century. They think it came from Italy and is therefore a riddle why it is named 'Hungarian'. Both patterns are made from the same sized pieces of wood that are installed in a synchronized zigzag pattern. Herringbone boards are rectangular and fit simply with tongue and groove. Hungarian point is cut at an angle causing the boards to form a perfect point.

DESIGNER 14P - Merlot Aged

Merlot

COLLECTION 04

To make our wooden floor look really old, dents and scratches are made on the board and in the bevel. Thus, it looks as if the floor has stood the test of time. This process is done entirely by hand, so we can talk about hand aged floors. Within the Cabbani range you can only choose "aged" on a birch plywood core in collections 2, 4 and 5.

Natural

COLLECTION 02

The size of the space determines the size of the boards. For smaller spaces, it is best to choose narrow, short boards. In large spaces, broad, long boards come more into their own. The orientation of the boards also has an effect. Long boards installed along the length of a room make the room look even longer.

Cabbani has also a nice range of pattern floors to give you room a superior appearance.

COLLECTION 04

The specific circumstances and applications are very important to determine the right choice of parquet. Will it be travelled intensively? Will it be used with or without underfloor heating? Will it be laid in an apartment or a single-family residence? Your distributor or flooring professional will be happy to help you find the solution that meets your needs.

DESIGNER 14H - Graves Rustic

Graves

COLLECTION 05

The reactive stains that we use at Cabbani are exceptionally beautiful and give the wood a weathered and aged look. Subtly nuanced differences in the colour pattern also contribute to this natural effect. These nuance differences result from the varying quantities of tannin that one tree species can contain, depending on the region or even the location in the forest. Tone and reaction differences are therefore completely normal and make our lye-treated floors unique. Collections 4 and 5 are a perfect example. Our hand aged distressing can offer a real added value and even improve the aged look.

Milk

COLLECTION 01

Like any wooden floor, Cabbani floors are also susceptible to scratches and dents. But it is precisely this lived-in aspect that provides authentic character. If you still prefer to avoid this, plenty of solutions are available: keeping the floor clean, a doormat, felt pads under furniture legs, protective mats under chairs with wheels...

If necessary, your parquet can also easily be repaired locally or freshened up using our specially developed maintenance products. Ask your dealer or installer for our maintenance kit for oil our lacquered floors. It's the perfect start for a well maintained beautiful floor.

PREMIER 14H - Milk Select

Sémillon

COLLECTION 05

Cabbani parquet is perfect for use in combination with underfloor heating, as long as the floor temperature does not rise above 27°C (80°F). Because there are different underfloor heating systems, we recommend following the manufacturer's instructions. Ask our distributors for more information. Specific laying instructions can also be found on www.cabbani.com/en/downloads.

DESIGNER 19H - Sémillon Rustic

DESIGNER 10H - Pure Rustic

Pure

COLLECTION 02

For our “Scratched” look, band saw marks are made on the oak top layer of your floor combined with our brushed effect. These markings are perpendicular to the wood grain and are applied to the surface haphazardly and in varied depths. That gives the wood a rustic, weathered look.

DESIGNER 10H - Pure Scratched

DESIGNER 19H - Bouchalès Rustic

Wood is a natural, humidity-sensitive material. Warping can sometimes occur under the influence of excess moisture or extremely dry air depending on the climate in your region or the conditions in your residence. To avoid possible problems, we recommend monitoring the air humidity using a hygrometer and maintaining the level with a humidifier or dehumidifier. More information about this is available on our website and in our installation instructions.

COLLECTION 02

The warm character of your wooden floor is closely connected with its maintenance. Indeed, maintaining wooden flooring not only keeps it clean, but also has a nourishing and protective function. We supply the necessary maintenance products that are specifically designed for our floors, whether varnished or oiled. More information about this is given on page 49.

Boreal

COLLECTION 04

We have all the necessary accessories to finish your Cabbani parquet perfectly. We have white pre-painted skirting's or beautiful 3 in 1 skirting's matching all of our design from our collection. The height of this veneer skirting board can be adjusted according to your taste or application. Furthermore, 3-in-1 profiles are also available (end, adjustment and transitional profiles) as well as matching stair tread nosing. More information is given on pages 51-52.

/HOW TO FINISH
YOUR FLOOR
AND KEEP IT IN
PERFECT SHAPE/

INTELLIGENT ACCESSORIES FOR A PERFECT FINISH

PREMIER 10H - Umber Select

1 VENEER SKIRTINGS

1 skirting, 3 heights

Cabbani skirting boards are available in 26 colours. The skirting boards are 8 cm (3") high, but can just as easily be shortened to 6 (2.4") or even 2.5 cm (1") in no time. The notches make it possible to place the skirting boards neatly and straight up to the desired height.

Skirting dimensions: 2150 x 80 x 14 mm (84.6" x 3.2" x 0.5")

2 PRE-PAINTED SKIRTINGS

Pre-painted skirtings with round edge on top, 69 mm high.

Dimensions : 2250 x 69 x 12mm
(88.58" x 2.71" x 0.47")

3 PROFILES

1 profile, 3 applications

Profiles are intended to create an elegant transition or to take up height differences. Our useful profiles can be used for 3 applications: as an end profile, adjustment profile or transition profile.

Profile dimensions: 2150 x 47 x 11 mm (84.6" x 1.9" x 0.4")

4 TREAD NOSING

Cabbani parquet can also be used to finish stairs. We have developed solid tread nosing specifically for this application in all 26 colours from our product range.

Dimensions:

2400 x 60 x 10, 14 or 18.5mm options
(94.5" x 2.4" x 3/8", 1/2" or 3/4" options)

5 SUBFLOORS

Cabbani parquet is usually glued down. However, if you do choose a floating installation, the parquet can easily be placed on a subfloor. In this case, only the tongue and the groove are glued to each other. Subfloors are primarily intended to provide a moisture barrier or noise muffling function. They are also able to conceal minor irregularities on the substrate.

- **NOISE DAMPING SUBFLOOR:** This 3.6 mm Cabbani subfloor with an aluminium layer on one side muffles reflected noise and conceals minor irregularities in the sublayer. Always put the aluminium side up and seal the edges of the strips tightly with Cabbani waterproof tape. This prevents moisture from the substrate from damaging the wooden floor.

- **STANDARD SUBFLOOR:** Our standard subfloor is 2 mm thick and consists of foam and plastic. The integrated plastic prevents damage to the wooden floor caused by moisture from the substrate. The edges of the strips also need to be affixed to each other tightly with Cabbani waterproof tape.

WATERPROOF TAPE: It is vital to protect your wooden floor from rising moisture. We strongly recommend only using our own, thoroughly tested waterproof tape to affix Cabbani subfloors to each other. This is the only way to guarantee adequate protection against moisture.

KEEP YOUR FLOOR IN GOOD CONDITION

MAINTAINING FLOORS WITH OILED FINISH

The oil we apply to our floors contains natural pigments and oils that may only be treated with our Cabbani maintenance and cleaning products.

For daily maintenance and long-lasting protection of your oiled floor, it is best to use a soft broom or vacuum cleaner, followed by cleaning with '**Cabbani parquet soap**'. To thoroughly refresh a dulled parquet and bring back its silky lustre, it is best to use '**Cabbani maintenance oil**' in concentrated form.

If your floor looks dull due to trodden-in and caked-on dirt, '**Cabbani intensive cleaner**' is the solution. This provides a deep cleaning that also removes some oil, which is why it is necessary to treat with '**Cabbani maintenance oil**' in concentrated form afterward.

If you have underfloor heating, '**Cabbani maintenance oil**' must be applied at least twice per year to nourish the wood adequately.

You can read our full maintenance instructions at www.cabbani.com/en/downloads.

MAINTAINING FLOORS WITH LACQUERED FINISH

It is important to avoid damaging the varnish when cleaning Cabbani floors with a varnish finish. That is why we recommend using our '**Cabbani cleaner**'. This has been specially developed to remove dirt safely while protecting the wood.

'**Cabbani cleaner**' is available in concentrated version and must be diluted with water. To add an extra wear layer to your floor and to avoid or mask micro scratches we advise you to use our '**Cabbani Polish**'. That extra protection makes your finish last longer and prevents adherence of dirt.
