

POLISH

PRODUCT DESCRIPTION

Is a water-based maintenance product that gives an extra protection layer / wear layer to all types of varnished floors. It provides an extra protective layer and also removes micro scratches to preserve the original state of your varnished floor. This extra protection ensures that the varnish lasts longer and prevents adhesion of dirt and facilitates daily maintenance.

TECHNICAL DATA

APPEARANCE	White colored fluid
PH VALUE	Ca. 8
FLAMMABILITY	Non-flammable

INSTRUCTIONS

Use the Cabbani Polish undiluted. First apply transversely to the wood grain and then mop evenly in the direction of the wood grain. If necessary, a second layer can be applied after 1 hour.

DRYING TIME

Minimum 1 hour at room temperature.

SPREADING CAPACITY

60 à 80 m²/l.

PRETREATMENT

Make the floor dust and grease free before applying the Cabbani Polish. You can first clean the floor with our Cabbani Cleaner.

SPECIFIC INFORMATION

Safety requirements: Keep out of the reach of children.
